

Water Leak Detection System

Water leak detection Cables (WD-CS)

General Description:-

Features -:

- PVC twisted pair with stainless steel 316 elements.
- The cable is restorable and corrosion resistant and does not require replacement after being wet.
- Cable can be installed in the path of a potential water leak.

Specifications:

- Material : PVC twisted pair with stainless steel 316 elements
- Leader Cable : 3 mtrs.
- Dimensions : 3.5mm dia.
- Cable lengths : It comes in multiple of 5mtrs
- Guarantee : 12 months from the date of supply.

Installation and Testing :-

- Installation: Install the WLD cable on the floor. Connect the leader end of WLD cable to WLD Panel.
- Testing: Place a wet cloth over the WLD cable to stimulate a water leak. The length of cable in contact with wet cloth should be at least 3-inches. An alarm will be sent to WLD Panel. Dry the WLD Cable to restore in normal mode.
